

Developmental Neurobiology and Pathologies

3-21 April 2018, Bordeaux Neurocampus, France

in partnership with ERA-NET NEURON

Course directors: Alain Chedotal, Eloisa Herrera, Julia Ladewig, Mireille Montcouquiol

Keynote speakers:

- Herwig Baier (Max Plank Institute Neurobiology)
- Paola Bovolenta (Centro de Biología Molecular Severo Ochoa (CBMSO) - CSIC)
- Fiona Doetsch (University of Basel)
- Elizabeth Engle (Harvard Medical School)
- Yukiko Gotoh (University of Tokyo)
- John Rubenstein (UCSF School of Medicine)
- Fanny Mann (Developmental Biology Institute of Marseille - IBDM)
- Oscar Marin (King's college London)
- Laurent Nguyen (GIGA, University of Liège)
- Dietmar Schmucker (VIB-KU Leuven Center for Brain & Disease Research)
- Esther Stoeckli (University of Zurich)
- Pierre Vanderhaeghen (University of Brussels ULB)

During this advanced 3-week course, we will provide participants with a comprehensive theoretical and experimental/practical training on the most advanced methodologies and models in developmental neurobiology, in health and disease.

World experts (both seniors and juniors) in the field of neural stem cells, brain patterning, neuronal migration, axon guidance or the genetics of human neurodevelopmental disorders will give stimulating lectures and design mini-projects to be carried out by the students.

Application deadline: 18 December 2017
